

Nastavitev odhodnega strežnika za povezavo preko SMTPS (SSL kodirana SMTP povezava) v **Microsoft Outlook 2007 (angleška različica)**.

1)

V meniju **Tools** izberemo **Account Settings** ter na zavihku **Email** izberemo poštni račun, za katerega želimo nastaviti strežnik za odhajajočo pošto.

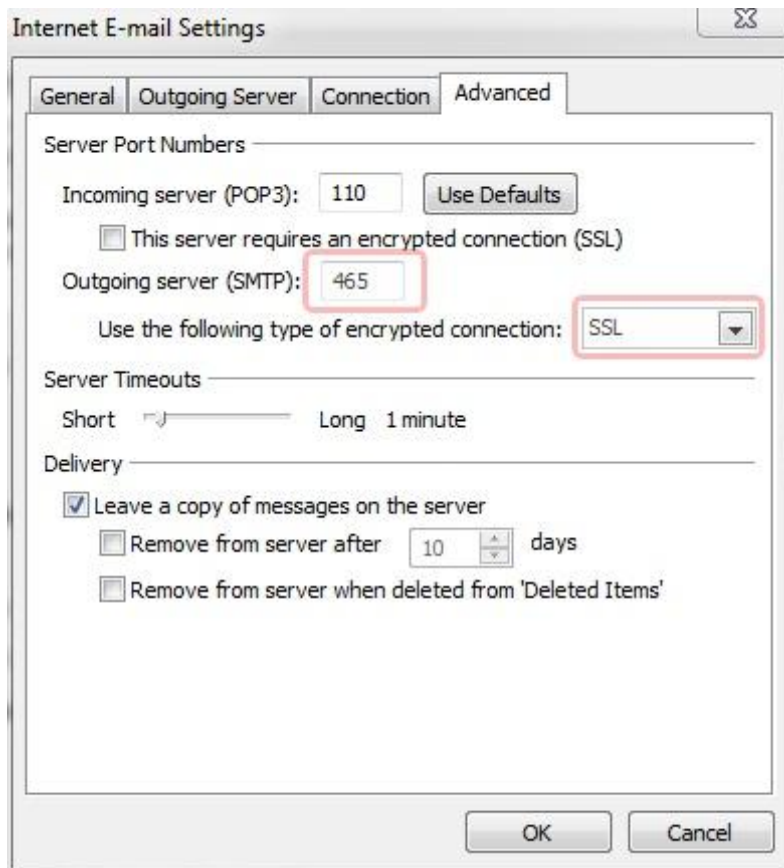

2)

V okence **Outgoing mail server (SMTP)** vpišemo strežnik **mail.aoi.eu**. Kliknemo gumb **More Settings**.

The screenshot shows the 'Change E-mail Account' dialog box with the 'Internet E-mail Settings' tab selected. The dialog box contains several sections: 'User Information' with fields for 'Your Name' (AOI SI Kropf, Zlatko E.) and 'E-mail Address' (zek1@aoi.eu); 'Server Information' with a dropdown for 'Account Type' (POP3), and text boxes for 'Incoming mail server' (mail.aoi.eu) and 'Outgoing mail server (SMTP)' (mail.aoi.eu); and 'Logon Information' with fields for 'User Name' (zek1@aoi.eu) and 'Password' (masked with asterisks), along with checkboxes for 'Remember password' (checked) and 'Require logon using Secure Password Authentication (SPA)'. A 'Test Account Settings ...' button is located in the 'Test Account Settings' section. At the bottom right, a 'More Settings ...' button is highlighted with a red box. At the bottom of the dialog, there are '< Back', 'Next >', and 'Cancel' buttons.

3)

Na zavihku **Advanced** v polje **Outgoing server (SMTP)** vpišemo vrednost **465**, v polje **Use the following type of encrypted connection** pa izberemo tip **SSL**.

Vpis nove nastavitve potrdimo z gumbom **Ok** oz. **Next**.

4)

Če imamo več poštnih računov pri AOI, za vsakega od računov ponovimo korake 1-3.

5)

Zapremo Microsoft Outlook. Nove nastavitve bodo pričele veljati ob ponovnem zagonu programa Microsoft Outlook.
